Bristol Bay in the News July 22, 2013

Sen. Lisa Murkowski made it crystal clear to the Pebble Partnership that continuing to talk about a mine plan but not actually submit one for nearly a decade is hurting the project and the state. In a strongly worded letter to the heads of the Pebble Partnership, Anglo American and Northern Dynasty Minerals, Sen. Murkowski wrote that "anxiety, frustration and confusion that have become the norm in many communities..." She asked the Pebble owners to establish a timeline and stick to it to provide clarity and certainty on their future plans. The letter was covered in a wide variety of outlets from *Politico* to the *Miami Herald* and more.

Gina McCarthy was confirmed as EPA Administrator last week and the *Washington Post* reports that she faces a long to-do list and in the top six is to "decide whether to block construction of Pebble Mine in Alaska."

A fisheries scientist who has studied the region in depth says Bristol Bay has "the largest, most diverse and valuable sockeye salmon runs left on the planet." Fish biologist Carol Ann Woody says, if anything, the science is actually conservative and clearly supports potential regulatory action by EPA to protect Bristol Bay. "After all, there are copper deposits all over the world; there is only one Bristol Bay," she wrote.

The developers of the proposed Pebble Mine in Alaska have been talking about the project for years, and Sen. Lisa Murkowski says it's high time they actually do something...[Click here to read more](#)

Sen. Lisa Murkowski criticizes planners of proposed Pebble Mine in Alaska

Trevor Graff, McClatchy Washington Bureau

McClatchy DC, Miami Herald, Kansas City Star, Wichita Eagle and San Luis Obispo Tribune

Sen. Lisa Murkowski, R-Alaska, this week called for the release of Pebble Partnership's detailed plans and a timeline for developing the Pebble Mine site near the headwaters of Bristol Bay in Southwest Alaska...[Click here to read more](#)

New EPA chief has an ambitious to-do list

Juliet Eilperin

The Washington Post

Now that Environmental Protection Agency administrator Gina McCarthy has been confirmed, she faces a lengthy to-do list. To get a sense of the pent-up demand for EPA action, consider how Sen. Sheldon Whitehouse (D-R.I.) put it in a statement Friday. "With so many challenges facing public health and the environment, it's important for Administrator McCarthy to hit the ground running...[Click here to read more](#)

EPA's Pebble assessment sells Bristol Bay salmon short

Carol Ann Woody

Alaska Dispatch

The science is clear in EPA's recent conservative Bristol Bay Watershed Assessment: Alaskans would trade our sustainable salmon resources for a nonrenewable, privately owned mineral resource and a highly risky perpetual waste and catastrophic threat management problem...[Click here to read more](#)

When You Mess with Salmon, You're Messing with Alaskans

Policy Mic

Last month I had the opportunity to visit Dillingham, Alaska — a town with no traffic lights, no movie theatres, and a population that could fit comfortably in a single New York City

high-rise. I had to fly there, because no roads lead to Dillingham. Although the town isn't quite the western edge of North American civilization, it's not far off...[Click here to read more](#)

Zack Colman and Ben Geman

The Hill

The developers of a controversial planned Alaskan copper-and-gold mine need to file their formal blueprint with the Environmental Protection Agency, Sen. Lisa Murkowski (R-Alaska) said Monday...[Click here to read more](#)

Public Opinion Rising Against Pebble Mine
Alaska Native News

A final tally isn't available yet, but the majority of opinion offered to the U.S. Environmental Protection Agency on its draft Bristol Bay watershed assessment rests firmly on the side of the fish, rather than copper, gold and molybdenum. The Bristol Bay Regional Seafood Development Association, having taken a hard look at responses posted on the EPA's website, noted that as of June 28, 68 percent...[Click here to read more](#)

Loud and Clear: 77% Think Pebble Mine is a Bad Idea
Colin K. Breck

Hatch Magazine

On June 30, the EPA closed its second public comment period regarding the latest draft of its risk assessment of large-scale open-pit mining in the Bristol Bay region of Alaska. Specifically addressed in the assessment are the likely scenarios that would result from the realization of the yet-to-be formally proposed but heavily researched and planned Pebble Mine...[Click here to read more](#)
